Luka Karsten Breitig

AI Agent Trainer & Software Engineer

🎓 100+ engineers trained

🌐 lukabreitig.com ✉️ hi@lukabreitig.com 💼 linkedin.com/in/lukabreitig

TRAINING FOCUS

AI Agents · Claude Code · Agentic Development · Subagents · MCP · Cursor · Codex · GitHub Copilot · SEO · Content Marketing · Ad Creation · Agents for Leadership · Vibe Coding

TRAINING LANGUAGES

🇩🇪 German (native)
🇬🇧 English (fluent)

FORMATS

- Half-day to multi-week workshops
- On site or remote
- Engineering, marketing & leadership teams
- Conference talks & keynotes
- Implementation consultancy

About

I'm an engineer who studied people.

B.Sc. Psychology (Osnabrück), M.A. Zeppelin University, top 2 % of my master's in management. I train engineering and marketing teams to hand real work to AI agents, so they get more done with the people they already have. As co-founder and CTO of The Happy Beavers for six years, I built the automation that cut manual processes by 80 % and let a core team of 11 run more than 150 freelancers. Engineers listen to someone who ships code; habits change with someone who knows why they formed.

WHAT TEAMS TAKE AWAY

- ⚡ Hand agents a whole ticket, not a prompt, and keep several running at once
- 🔧 Double the output with the same headcount, with guardrails that hold
- 🗺️ A rollout that takes agents from a few enthusiasts to the whole team

Training Topics

- **Agentic Development with Claude Code**
  The core: brief an agent with the ticket and its context, let it plan, edit and run the tests until they pass, then review and merge. The same workflows in Cursor, Codex and GitHub Copilot.
- **Parallel Work, Subagents & MCP**
  Several agents, one engineer reviewing. Connecting agents to your issue tracker, docs, databases and internal APIs through MCP, so they work with your team's context.
- **Quality at Volume & Team Rollout**
  Review practices and guardrails that hold as output rises, and taking agents from a few enthusiasts to the whole team.
- **AI Agents for Marketing Teams**
  Agents for SEO, content marketing, ad creation, research and reporting, run on your own brand and campaigns. Plus Vibe Coding: from an idea to a working tool in a day, no developer needed.
- **AI Agents for Leadership Teams**
  Run on your own company's work: which tasks to hand to agents, what to build, buy or leave alone, and a rollout your people actually follow.

Hands-on and adapted to each group: in-house on your own codebase and tasks, or as open courses. Further topics on request.

AVAILABLE FOR TRAINING, CONSULTING & TALKS **lukabreitig.com**

Training & Course Creation

Deutsche Telekom
Multi-module AI coding programme for engineering teams, via Cegos Integrata

financial.com
Three-day hands-on Cursor AI workshop for the engineering team

Innomotics
In-house AI training for Siemens spin-off engineering teams

NobleProg
AI coding workshops via global IT training provider

Cegos Integrata
Commissioned trainer via leading European L&D provider

Code First Girls
Course creator of a 3-month AI & agentic tools curriculum

MARKETING & AGENCIES

The Happy Beavers
Co-founder & CTO: months of weekly AI training for the marketing agency team

Digitality Agency
Training for the design team in using LLMs for coding work

> *"We had a Cursor AI training with Luka. He is a highly competent trainer who answered all our questions thoroughly and adapted the course to our needs and preferences. I highly recommend working with him!"*
